

KEGG_2021_Human

Enriched terms

Protein processing in endoplasmic reticu...
 Protein export
 B cell receptor signaling pathway
 Glycine, serine and threonine metabolism
 N-Glycan biosynthesis
 Sulfur metabolism
 Various types of N-glycan biosynthesis
 Amino sugar and nucleotide sugar metabol...
 Intestinal immune network for IgA produc...
 Aldosterone-regulated sodium reabsorptio...
 Glyoxylate and dicarboxylate metabolism
 Cell adhesion molecules
 Lysosome
 Basal cell carcinoma
 Glycosaminoglycan degradation
 Protein digestion and absorption
 Primary immunodeficiency
 Vibrio cholerae infection
 Ascorbate and aldarate metabolism
 Fc gamma R-mediated phagocytosis
